#bike #garden #short supply chain

Inter-municipal association dedicated to supporting biodiversity and respect for nature.

Structure : Vert Demain Collective

Fountains of Saint Martin

Auvergne-Rhône-Alpes

Our collective brings together residents of the towns in the Val de Saône (Fontaines-Saint-Martin, Fontaines-sur-Saône, Cailloux-sur-Fontaines, Rochetaillée) to support biodiversity and respect for nature.

OUR MISSION

To connect residents of the Val de Saône who are concerned about issues related to sustainable development, ecology, and the environment.

OUR INITIATIVES

– Garden Circle: A community garden is gradually taking shape to promote biodiversity based on the concept of a “forest garden.”

A pallet hut, water-conscious management, planting, seed swaps… There's no shortage of activities if you'd like to get involved.

– Short Supply Chain Circle: citrus fruit delivery in partnership with a group of organic producers, based on the principle of fair pricing for producers, transporters, and consumers.

– Zero Waste (or Almost) Circle: awareness workshops on small actions that make a difference.

– Sustainable Transportation Circle: the collective organizes or participates in initiatives to promote cycling in the city.
