Promote food and energy self-sufficiency while encouraging environmentally friendly practices

Structure : Collective for the Intelligent Management of Nature and Permaculture

Brantôme in the Périgord

New Aquitaine

Through our projects, we aim to promote food and energy self-sufficiency while encouraging environmentally friendly practices. We organize events and workshops and provide resources to support individuals and communities.

Founded by Marius Ghislain and Sofian Bétrancourt, our organization promotes sustainable agriculture, self-sufficiency, and small-scale farming. Workshops, events, and resources help everyone move toward food and energy self-sufficiency. Join us in building an eco-friendly and inclusive future!
