INTER-MUNICIPAL ASSOCIATION DEDICATED TO SUPPORTING BIODIVERSITY AND RESPECT FOR NATURE.

Structure : Vert Demain Collective

Fountains of Saint
MartinAuvergne-Rhône-
Alpes

Our collective brings together residents of the towns in the Val de Saône (Fontaines-Saint-Martin, Fontaines-sur-Saône, Cailloux-sur-Fontaines, Rochetaillée) to support biodiversity and respect for nature.

-

OUR MISSION

To connect residents of the Val de Saône who are concerned about issues related to sustainable development, ecology, and the environment.

-

OUR INITIATIVES

– Garden Circle: A community garden is gradually taking shape to promote biodiversity based on the concept of a “forest garden.”

A pallet hut, water-conscious management, planting, seed swaps... There's no shortage of activities if you'd like to get involved.

- Short Supply Chain Circle: citrus fruit delivery in partnership with a group of organic producers, based on the principle of fair pricing for producers, transporters, and consumers.
- Zero Waste (or Almost) Circle: awareness workshops on small actions that make a difference.
- Sustainable Transportation Circle: the collective organizes or participates in initiatives to promote cycling in the city.
