#circular economy #gift

Without a car, social and professional exclusion worsens. Solidarauto works to reduce this fundamental inequality by providing concrete, community-based solutions.

Structure : Solidarauto Network

Solidarauto is a national nonprofit network of associations founded with the aim of **addressing the issue of limited access to transportation** in France. Since our inception, our mission has been clear: **to make cars accessible to everyone** by offering reliable vehicles at affordable prices, along with **maintenance and repair services** tailored to each person's financial situation.

The Solidarauto Federation, a nonprofit association under the French Law of 1901, brings together a network of community-minded garages spread across the entire country, supported locally by social and solidarity economy (SSE) associations. All share the same goal: **to facilitate access to mobility**, an essential prerequisite for employment, education, health, and independence.

The model is based on a **circular and solidarity-based economy**:
