Eco-friendly community in Pas-de-Calais

Structure : ECO SOLIDARITY HAMLET

Hauts-de-France

Eco Hameau Solidaire aims to sustain and develop a participatory rural community in Audincthun, in the Pas-de-Calais region, by organizing events, bringing the community to life, and promoting this model of living.

This intergenerational, community-based eco-housing project is located in a former farmhouse in the countryside, between St. Omer and Calais.

Our project aims to bring together a group of 5 to 10 families, diverse in age, composition, and financial resources, but united by the values of solidarity, respect for life and nature, and a willingness to share their skills, tools, and more...

We want a participatory eco-community that allows us to live in private, energy-efficient housing tailored to our needs, while also featuring communal spaces for socializing and welcoming our families and friends.

These communal spaces could also be used for cultural and community initiatives, etc.

We also want a garden large enough to allow the group of residents to aim for food self-sufficiency, but also to be able to open it up to the outside world and welcome fellow gardeners.
