#sustainability

Educational program on the challenges of healthy and sustainable eating

Structure : I love my planet

Onex

Since the 2022–2023 school year, we have been working with elementary school classes in Onésia as part of the School Agenda 30 initiative. The School Agenda 30 aims to instill the themes of the municipal Agenda 30 in younger generations. In this context, we have developed a comprehensive educational program consisting of several modules that allow students to explore and better understand the challenges of healthy and sustainable eating.

Specifically:

Conceptualization and development of module content and materials:
role-playing games, cooking workshops, etc.

Annual planning and coordination with participating schools

Delivery of sessions for 5th and 6th grade classes (ages 8–12)

Monitoring, evaluation, and reporting of annual results
