Environmental organization, seabed cleanup

Structure : BLUE FONDS 06

Antibes

Provence-Alpes-Côte d'Azur

Our goal

To dive among fish, seagrass, and dolphins, and rediscover the deep blue sea just as nature created it!

Our mission

Every Tuesday, we dive around Antibes to clear as much trash as possible from our seabed.

To eliminate all this pollution and ensure our human footprint disappears!

NICE MATIN: " *‘A drop in the ocean of trash, but it’s still one less’: a group of divers removes hundreds of pounds of tires from the seabed in Juan-les-Pins On Thursday, January 15, 2026, the Fonds Bleus association cleared the sea of trash in Juan-les-Pins—some of which had been buried under the sand since the 1960s. A physically demanding mission, carried out by volunteers using free-diving techniques."*
