#alternative #ethics

Free and user-friendly web hosting

Structure : The Cloud Clove

Founded in 2020, the Cloud de Girofle association was created out of a desire to offer everyone—without discrimination—whether individuals, associations, collectives, or organizations—an alternative to the services provided by the tech giants.

It promotes and defends a libertarian approach that respects privacy and fundamental freedoms in the spirit of CHATONS (Collectif d'Hébergeurs Alternatifs, Transparents, Ouverts, Neutres et Solidaires), whose charter we adhere to. We have been members of the CHATONS collective since December 2020.

Cloud Girofle:

- hosts and develops free software
- raises awareness about digital issues
- educates on the technical, social, and ethical issues of the Web.
