SUPPORT THE CREATION OF A LEADING CENTER FOR PERMACULTURE

Structure : GARDEN OF CONNECTION

TOURVES

Provence-Alpes-
Côte d'Azur

For the sake of our food security and the health of the Earth, there is a need to reforest agricultural land using the forest garden concept.

THE JARDINS DE RELIANCE ASSOCIATION AIMS TO HELP CREATE A LEADING PERMACULTURE SPACE

To experiment with methods of soil regeneration, grow organic matter, and create a leading space in permaculture.

SUSTAINING THE ÉTANGS FOREST GARDEN FOR THE COMING YEARS:

- Hosting interns, volunteers, and the general public to learn about the regenerative soil system.
- Monitoring the 550 trees: grafting, mulching, weeding, pruning, and sowing green manure.
- Planting other layers with vines, shrubs, and small trees.
- Introducing chickens to the orchard as predators, building a mobile chicken coop.
- Creating a processing workshop and a storage area.
- Creation of introductory sessions on reforestation of agricultural land using the forest garden concept, open to the general public.
- Development of tours and technical visits with the creation of technical fact sheets on the species and varieties planted at the [Jardin-Forêt des Étangs](#) (JAFE).
- Establishment of Agricultural Civil Societies: 1 hectare, 1 purchasing collective, 1 farmer.
- Communication on the need to reforest agricultural land using the forest garden concept. To this end, creation of communication tools.
- Soil analysis and testing with a laboratory.
- Training needs: on tree pruning and planting, soil microbiology, and permaculture certification.
- Purchase of small equipment: broadfork hoes, small chainsaw, planting stick.
- Purchase of a solar oven and a solar dryer.
