#workshop

A group dedicated to fostering a user community and managing a collaborative third place

Structure : AGORA MACAU

Macau | New Aquitaine

Founded in 2024, the association is run by a collective dedicated to fostering a community of users and managing a collaborative third place in the town of Macau, with the goal of pooling resources and skills and developing economic, social, cultural, and environmental activities.

The space is still in transition, but the collective is brimming with ideas and aspirations that they are beginning to bring to life:

- - an orchard with a test area
- - participatory workshops and projects
- - games

...

This third place will become whatever the association’s members want it to be: a community café, a recycling center, a coworking space, and more.

A project created in close collaboration with the city hall.
