#garden

Community garden

Structure : The Bérines Community Gardens

LEOGNAN | New Aquitaine

October 2022. In the heart of Léognan's Parc des Bérines, a new community project is taking shape: a community garden! Local residents from near and far are seizing this opportunity to work together on a space that is both welcoming and productive.

The Léognan town hall is supporting the food resilience project implemented by the prefecture to co-fund the necessary work and purchases.

And now? Work is progressing, but watch out for the deer, who find the bean sprouts particularly tasty!
