Promotion of active and sustainable transportation

Structure : Amobisol

TALAN | Burgundy-Franche-Comté

AMOBISOL works to promote active and sustainable modes of transportation, including those powered by solar energy.
Its efforts are part of a broader commitment to energy transition, combating global warming, and protecting the environment.

ASSOCIATION FOR SUSTAINABLE AND SOLAR MOBILITY Our goal is to promote sustainable active transportation and solar-powered mobility. Our work is part of a broader effort toward energy transition, combating global warming, and protecting the environment

Who are we?

We carry out information and awareness-raising initiatives regarding sustainable and solar-powered mobility:- creating a database on solar-powered bicycles, their design, and construction;
- organizing events, exhibitions, and screenings of documentary films for the general public, schools, socio-cultural institutions, associations, and local communities;
- engaging with social communities;

Our initiatives:

“Converting a Bike to Electric” Workshop: This event is organized in partnership with the Mâcon Vélo en Ville association. It takes place in two complementary parts: a technical presentation in the morning followed by the conversion of mechanical bikes into electric bikes in the afternoon.

Solar-powered bicycle: Amobisol offers a two-day workshop for those interested in this form of travel to learn how to build a solar-powered bicycle
