#carbon #forest #support

An organization dedicated to reforesting our forests and helping businesses achieve carbon neutrality

Structure : Treecolore Carbon

Péssac New Aquitaine

Treecolore Carbone is a Gironde-based nonprofit dedicated to reforesting our forests in the wake of the climate-related damage of 2022. We also work to reforest vineyard and farmland that has become fallow in the Gironde region.

The association’s members are dedicated to raising awareness among businesses and individuals about the carbon emissions generated by their activities and the solutions available to them for offsetting these emissions.

The association offers companies that have already conducted a carbon assessment as part of their CSR initiatives the opportunity to offset the portion of CO2 that cannot be fully reduced.

To help companies achieve carbon neutrality, we propose planting trees on forest plots damaged by wildfires.

Our Activities Raising Awareness Among Property Owners and Business Leaders

- Selecting plots for reforestation
- Raising awareness among businesses
- Raising funds
- Fund reforestation and support forest owners affected by wildfires
