Biodiversity conservation, with a focus on field research and scientific eco-volunteering

Structure : Cybelle Planète

Villeneuve-les-Maguelonne

Occitanie

Cybelle Planète is a non-profit organization established under the French Law of 1901 that has been dedicated for over 20 years to biodiversity conservation, field research, and scientific eco-volunteering, both in France and internationally.

Since its founding, Cybelle Planète has developed and supported conservation projects on every continent, prioritizing:

- the direct involvement of eco-volunteers.
- scientific quality,

- environmental ethics,
- the sustainability of partnerships.

Our Areas of Action
Cybelle Planète works to protect biodiversity through scientific and community-based programs, both in France and internationally.

• **In the Mediterranean Sea**, through expeditions dedicated to the study and protection of cetaceans.
• **Internationally**, in partnership with local conservation and research projects, hosting volunteers engaged in the field.

Key figures Since 2005
50 conservation projects: Cybelle Planète has offered around 50 conservation projects in 25 countries where it operates.

3,200 eco-volunteers: 3,200 eco-volunteers have participated in eco-volunteer missions since 2005

Each mission offered by Cybelle Planète corresponds to a specific project, with:

- clear conservation objectives,
- a defined scientific or technical framework,
- participation conditions adapted to the field,
- local supervision and organizational coordination.
