Creation and management of community gardens open to everyone on the University of Burgundy campus

Structure : Edible Campus

Dijon | Burgundy-Franche-Comté

Campus Comestible works to create and manage community gardens open to everyone on the University of Burgundy campus. Its goal is to raise awareness among campus users about environmental conservation, biodiversity, and the values of sharing and solidarity.

Who are we?

We are ***Campus Comestible***, a student-led, socially responsible, and eco-conscious organization dedicated to creating, organizing, and managing community gardens open to everyone (citizens and campus users) on the University of Dijon campus through the establishment of an educational trail focused on environmental education and sustainable development.

Missions

- Create, facilitate, and manage Shared Gardens on campus
- Management and facilitation of educational vegetable garden plots
- Environmental and sustainable development education
- Artistic and cultural events centered around the gardens

Goals

- Raising awareness of eco-friendly practices and environmental conservation
- To foster the development of a network of knowledge and exchange
- Foster the development of a social and supportive community
- To provide access to healthy food for those who cannot afford it
- Raise awareness of eco-friendly practices and environmental conservation
- Foster the development of a network for knowledge and exchange
- Foster the development of a social and supportive community

- Enabling those who cannot afford to eat healthy foods

Vision:

- Develop urban and community-based agriculture
- Contribute to the ecological transition in urban areas
- Increasing the resilience of communities in the face of future changes
