To raise awareness about nature and its conservation among as many people as possible through various means.

Structure : The Best of the Best

Lucenay-le-Duc

Burgundy-Franche-Comté

La crème des Cerfs is an organization of young enthusiasts dedicated to raising awareness about nature and its conservation in a variety of ways.

Mission

The association aims to promote, facilitate, and diversify access to knowledge about nature and its protection for as many people as possible by working with all segments of the public.

La Crème des Cerfs has been officially in existence since February 27, 2024. Founded by passionate young people with degrees in Natural Environment and Wildlife Management (GMNF), the association aims to promote, facilitate, and diversify access to knowledge about nature and its protection. It is, quite simply, about raising awareness.

We focus heavily on interactive activities to provide knowledge in a more engaging way than simple theoretical training. This is what allows the association to adapt to any type of audience.

We offer:

Discovery Hikes

Discover nature, its inhabitants, and all its benefits through a hike near you, organized by our guides. Whether by day or by night, our team designs routes tailored to your preferences. Experience nature from a different perspective.

Nature in Every Sense

Discover nature with your eyes, ears, nose, hands, and maybe even your taste buds. You might be surprised by all that nature has to offer.

Hands-on Nature

Land art, natural instruments, plant-based paints, and more. Through fun activities, discover what we can create with what Mother Nature provides.
