#environment

Protecting areas, resources, natural habitats, and biodiversity

Structure : FRIENDS OF THE BORMETTES

La Londe-les-Maures

Provence-Alpes-Côte d'Azur

Protecting natural spaces, resources, environments, habitats, biodiversity, and the natural environment

Our association works to protect and preserve natural spaces, resources, environments, habitats, animal and plant species, ecological diversity, fundamental balances, landscapes, and the living environment. We fight against pollution and nuisances,

We are citizens aware of the current challenges related to climate and the environment. We have observed the obsolescence of outdated urban approaches, with more devastating floods, a decline in drinking water reserves, and a reduction in agricultural land.

Convinced of the imperative to raise awareness, our association is actively committed to placing the public interest above an outdated vision that favors land development at the expense of preserving and enhancing natural areas.

However, we are also aware of the economic stakes, particularly with the return of the industrial firm Naval Group to these historic lands, which are currently not zoned for construction. Our project aims to prevent the emergence of other ancillary projects that run counter to the climate imperatives imposed upon us. Protecting the few hectares of land not allocated to the industrial firm is essential to ensuring environmentally responsible management.
