CONTRIBUTE TO LOCAL TERRITORIAL RESILIENCE THAT INCORPORATES THE MANY TRANSITIONS

Structure : COLLECTIVE NOUS

Forcalqueiret

Provence-Alpes-
Côte d'Azur

The NOUS Collective aims to contribute to local community resilience that incorporates the many transitions taking place (energy, environmental, social, societal, etc.) by implementing awareness-raising and informational initiatives that foster collaboration and build connections.

We are a collective of citizens who want to contribute locally to the changes taking place in our world.

To do this, we organize “transition cafés” to understand and raise awareness of global climate issues, environmental upheavals, and the needs of the Provence Verte region regarding

ecological transition.

Every month, we host a discussion with an expert on a specific topic, featuring examples of concrete local initiatives (climate murals, plastic pollution) and community-led actions to work together (helping a young farmer get started, waste collection, etc.).
