#donations

A platform for people to give away items to others for reuse

Structure : OCCAZOU

LA GARDE

Provence-Alpes-Côte d'Azur

A platform for peer-to-peer donations: reducing consumption and reusing secondhand items that are still functional and in good condition in everyday life

The association’s purpose is to manage a donation center; its goal is to promote the gift economy (which is at once social and community-oriented, circular, and collaborative). The association has a threefold mission: **environmental, social, and civic.**

Our mission is to raise public awareness about reducing consumption, conserving resources through the reuse and repurposing of items, and managing them through their end-of-life cycle.

The volunteer members who take turns running the space also organize activities, workshops, and themed discussions to: inform and raise awareness among current and future members

about the circular economy, the sharing of possessions, and solidarity among citizens.
