BRINGING TOGETHER PEOPLE WHO ARE PROACTIVE IN CHANGING THE WAY WE LIVE, OUR SOCIETY, AND OUR RELATIONSHIP WITH NATURE

Structure : LET'S WAKE UP

Giron

Auvergne-Rhône-
Alpes

The Association aims to bring together proactive individuals committed to transforming the way we live, our society, and our relationship with nature, in a respectful environment that harmoniously blends the human, animal, and plant worlds—a place where we can live in accordance with our values, exchange ideas, and discover ecological, humanistic, and sustainable solutions.

Measures implemented:

The Association offers the organization of events, classes, educational initiatives, and training in the arts, culture, and personal development...

Resources: Merchandising of these works in all their forms, sale of its products, etc.

Additionally, the Association may engage in real estate rentals, the donation of proceeds to other associations pursuing social, humanitarian, or artistic goals, as well as other related activities, provided that these activities help achieve the Association's stated purpose

Project: We aim to build, on a plot of land spanning several hectares of flat or rolling terrain, a house—either renovated or newly constructed—that is fully self-sufficient and eco-friendly, potentially supplemented by lightweight structures or bio-climatic underground homes fully integrated into the natural landscape to preserve the scenery

It will consist of various components, which will be detailed below:

- An animal shelter / educational farm
- A center offering various personal care services
- A facility for people with disabilities who do not always have suitable accommodations
- A place for a few people in the process of reintegration
- Permaculture vegetable farming, an edible forest, and beekeeping
- Organizing training sessions, conferences, performances, workshops, and web and TV programs to create a hub of local and national activity
- Hosting eco-tourism
