## PLATFORM FOR SHARING SEEDS AND EXPERTISE

Structure : SEEDS FOR TRADE

Périgny

New Aquitaine

Another way to share seeds and knowledge. Together, let's preserve agricultural biodiversity.

### What is Graines de Troc?

Graines de Troc is a non-profit organization established in May 2012. Its primary goal is to work to protect cultivated biodiversity and promote the exchange of seeds and knowledge. At the heart of our activities is our **free seed-swapping platform**, where anyone can offer and exchange seeds. Together, we build a shared collection of common and heirloom varieties and rediscover rare or little-known varieties! Through this simple act, we preserve what our ancestors have passed down to us.

With the aim of sharing knowledge and seeds and developing our seed self-sufficiency, the association has diversified its activities and is expanding nationwide with the emergence of local chapters throughout France.

Graines de Troc is now able to offer a wide range of services and products: production and sale of seeds and seedlings (the shop), events, permaculture training on seeds and permaculture, seed banks, design support, and, since 2022, custom seed packets.

We also support [collectives](#) working to defend cultivated biodiversity against those who monopolize living organisms and standardize them excessively, by facilitating essential [local exchanges](#).

### How does the seed exchange platform work?

Anyone can offer and exchange seeds. Each seed shipment earns a token and allows you to choose from the varieties in the collection.

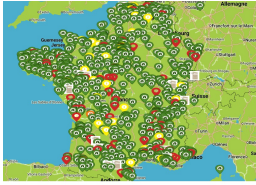

### Some figures:

- There are 40,136 registered barterers on the platform.
- There is a database of 10,115 varieties.
- There have been 160,229 seed batches exchanged
