#ecology

Community garden to foster social connections and create a space for learning about ecology

Structure : THE GARDEN IS TAKING SHAPE

St. Chamond

Auvergne-Rhône-Alpes

Subject:

To promote respect for the environment by creating a space for learning about ecology and biodiversity conservation;

to create a place for training and knowledge sharing in agroecology and permaculture; to produce high-quality food that promotes good health;

create a platform for intergenerational exchange

promote social cohesion through "healthy" engagement in a society where social bonds are weakening; create a cross-cutting space that periodically organizes cultural events to foster exchange and sharing.
