## SHARING MOMENTS OF TOGETHERNESS WITH EVERYONE THROUGH GARDENING ACTIVITIES

Structure : COOP'SOL

### LA FABRIQUE DE LA TRANSITION

Saint-Étienne

Auvergne-Rhône-  
Alpes

Founded in 2021, the association promotes social connection and offers opportunities to share moments of camaraderie with anyone who wishes to participate through community gardening initiatives. Several plots of land around Saint-Etienne are cultivated in partnership with local farmers and the Montravel campus.

The goal is to facilitate the transfer of agricultural knowledge through collaborative learning and to collectively experiment with food democracy. Based on mutual aid and cooperation, this network of production and exchange fosters solidarity without the distinction of helper and helped

Our association farms on land loaned by farmers who have been organic for several years. A single plot of fallow land will be made available by the city. Our produce will be sold to other associations and, perhaps next year, at the neighborhood farm platform.

### **Join our vegetable gardening projects**

Joining COOPSOL42 means coming to cultivate fields and gardens, learning and sharing knowledge about agriculture, and enjoying friendly moments with all members.

All with the goal of taking back control of our food!
