Préher Community Garden

At the request of the Centre II neighborhood council, a 130-square-meter community garden was established on the square in 2008. The residents have been organized as an association since December 2011.

The goal of this community garden is to foster social connections through gardening. The harvested vegetables will be served at neighborhood festivals.

A partnership exists between this garden and a retirement home.

An ongoing project with the children of the Amicale Laique Michelet.

A community composting project with neighborhood residents is about to get underway.
