GUIDE: Toward a Free and Collaborative Digital Future

Structure : TRANSITION FACTORY (Open Source)

VERS UN NUMERIQUE LIBRE

FABRIQUE DE LA TRANSITION

Saint-Étienne | Auvergne-Rhône-Alpes

Transition Factory: Bringing together the strengths of alternative, activist, and environmental networks in Saint-Étienne to accelerate the transition toward a more sustainable and equitable long-term model across the region.

TOWARD A FREE AND COLLABORATIVE DIGITAL FUTURE

Digital tools are essential to our community and cooperative projects: they allow us to communicate, collaborate, and launch initiatives. However, digital technology is also a social and environmental issue.

The “Commun Numérique” Project

An alternative to GAFAM, Commun Numérique is a professional solution for a comprehensive, free, ethical, and efficient digital work environment:

- No more dependence on web giants
- Gain security and collaboration

This project aims to build a digital work environment that meets the needs of the Saint-Étienne region, with tools aligned with its values.

Project Objective

- Support associations, cooperatives, social economy organizations, and committed small businesses in transitioning to a digital environment designed and managed for the collective good

- To shift certain digital practices toward others that reflect our values and objectives

Our shared tools

- NEXCLOUD: Cloud storage for documents and applications
- MATTERMOST: Instant messaging service
- BIGBLUEBUTTON: Video conferencing tool
- BITWARDEN: Password manager
- MOBILIZON: Open-source tool (Alternative to Facebook)
- PEERTUBE: Open-source video hosting software (Alternative to YouTube)
