#agriculture #environment

A community-run farm where you can learn market gardening while supporting small-scale farming

Structure : THE GREENS OF THE EARTH

La Roche-sur-Foron

Auvergne-Rhône-Alpes

"Les Verts de Terre: Sowing the Seeds of Food Self-Sufficiency." Join our community-owned, collective, and participatory farm—optimized and bio-intensive!

Learn the secrets of market gardeners from the pros

The Les Verts de Terre Association is dedicated to creating positive change by promoting sustainable, local, and ethical agriculture.

We are firmly committed to supporting small-scale farming by establishing partnerships between conscious consumers and local producers dedicated to environmentally friendly production.

Our commitment is reflected in the implementation of transparent contracts, ensuring a regular supply of high-quality produce, eggs, bread, and more, delivered directly in personalized

baskets. Members will thus enjoy healthy food while actively contributing to environmental preservation.

The charter we have developed, incorporated into our bylaws, guarantees adherence to the ethical standards we uphold. Furthermore, we encourage our members' active participation in all aspects of the Association, making each member a key player in our shared mission.

We aspire to create a positive impact on rural communities by promoting socially equitable, environmentally sound, and job-creating activities.

While adhering to legal frameworks, we are prepared to take all necessary civil or commercial actions to help achieve our noble goal. Join us on this journey toward a sustainable and ethical future, where every action counts toward building a better world.
