#accommodation #eco-site

Eco-friendly destination for responsible tourism and organic farming

Structure : Cablanc

Saussignac

Cablanc is a small **organic farm** that adheres to the principles of **agroecology** and **permaculture** design.

Responsible tourism and **sustainable development** are a reality here, where harmony between nature and people is constantly sought. We make a positive impact every day through our actions, thanks to the smart use of local resources. We are all hummingbirds.
Each of us can make small changes every day and thereby raise awareness among those around us. Our habits regarding consumption, energy, and entertainment… influence the world. Everything is interconnected.
Our wish? To welcome people seeking a **healthier, more mindful life** who want to experience **authentic**, rejuvenating **vacations** in the heart of an eco-community.
