Protection of the ecological integrity, balance, and dynamics of the region

Structure : ADEEP (Association for the Protection of the Environment, Water, and Cultural Heritage)

Lorgues | Provence-Alpes-Côte d'Azur

The purpose of the association is to protect the ecological integrity, balance, and dynamics of the land and environment in the municipalities of Les Arcs-sur-Argens, Lorgues, and neighboring municipalities.

Who are we?

We are pleased to announce the creation of **ADEEP**, the **A**ssociation for the Defense of the **E** nvironment, **Water**, and Heritage of Lorgues, Flayosc, Saint-Antonin, Taradeau, Le Thoronet, Vidauban, Les Arcs, Le Cannet-des-Maures, La Garde, and Freinet.

Our association’s purpose is to protect the ecological integrity, balance, and dynamics of the territory and environment of the municipalities listed above.

We have come together to protect nature—of which we are a part—water and its waterways, which we consider absolute priorities, and the remarkable buildings of our beautiful communities. We will keep ourselves and you informed about projects impacting the environment, water, and heritage; support those that promote the protection and resilience of our region; and, if necessary, fight—including through legal means—against projects that would damage our lovely corner of the country.
