Supporting local governments in promoting sustainable mobility

Structure : Association of Transportation Authorities (GART)

The Association of Local Authorities for Mobility

Drawing on the diversity of the regions it represents and the various political perspectives within its membership, GART supports mobility planning authorities—local and regional AOMs, communities of municipalities, and departments—in exercising their responsibilities regarding mobility. Our efforts to promote sustainable mobility and defend the interests of local governments have consistently established our association as a recognized and influential player in the field of mobility in France.
