#inclusion #integration #travel

Support all regions and all segments of the population in taking action to reduce transportation insecurity, and make inclusive mobility a cornerstone of the ecological transition

Structure : Wimoov

For 25 years, Wimoov has championed the cause of inclusive mobility—that is, mobility accessible to all, designed with people in vulnerable situations due to cognitive, material, or financial challenges in mind, and therefore tailored to meet the needs of all communities. Wimoov is convinced that access to mobility is the key factor in the success of policies across all urban, suburban, and rural areas, as well as in the social integration of its citizens.
Today, supported by its 1,000 national and operational partners, more than 250 Wimoov professionals are united by a shared philosophy of action: to support all vulnerable groups in achieving sustainable, autonomous, and responsible mobility.
