Raise awareness and encourage action on eco-friendly practices: Water, Energy, Zero Waste, Eco-mobility, Digital Technology, and Responsible Consumption

Structure : Eco-Geek

Bordeaux | New Aquitaine

At Ekolo Geek, we firmly believe that individual actions are a simple way for everyone to thrive and actively contribute, each in their own way, to making the world we live in a better place.

Since 2007, the organization has been raising awareness and encouraging eco-friendly actions in the areas of water and energy, zero waste, eco-mobility, digital technology, and responsible consumption. We work with young people, the general public, professionals, and the social sector.

Based in Bordeaux, we carry out our initiatives on the ground (informative booths, workshops, support, and awareness-raising tools) and online (website, social media, newsletter, etc.).
