#collaborate #create #to invent #train

Take action, learn, transform: Toward an ecological and social transition, here and now.

Structure : 3PA Training

Lahage Occitanie

Invent, create, collaborate

3PA is a space for societal development where ecology is at the core. The projects carried out within the association work to envision the future. How should we educate ourselves, how should we feed ourselves, cultivate, build social connections, and shape society while facing the ecological upheavals that lie ahead? This is the cross-cutting and foundational focus of the association.

3PA is organized around two pillars: people at the heart of the transition (Education-Training-Integration) and the transition serving local communities (Culture-Third Places-Food)

Our projects come to life at the heart of our **rural third place, Bordanova**, a unique space located in **Lahage**, 45 km from Toulouse. This living and experimental space encompasses **3,000 m² of facilities** and **13 hectares of land**: shared workspaces, workshops, a kitchen-cafeteria, an educational garden, natural habitats… A true hub for engagement, knowledge-sharing, and cooperation.
