Connecting ideas, Sharing knowledge, Working together

Structure : COM4DEV

COM4DEV

Montpellier | Occitanie

Com4Dev supports or leads cooperation projects, particularly at the international level. These projects involve various partner organizations. Com4Dev's approach is to enhance the purpose and impact of these projects. This approach is based on listening, co-creation, and sharing, with the aim of developing tailored strategies, building team capacity, and fostering collective learning. By contributing through its various areas of expertise, the association seeks to make initiatives more sustainable, more effective, and better connected to their stakeholders.

THEMES

Development challenges cannot be addressed without taking into account the social, cultural, and environmental realities that shape them. Com4Dev focuses its work on themes where social justice, sustainability, and innovation intersect. Food systems, youth and human rights, and cultural and creative industries: these are the fields where the association works alongside its partners to foster collective, inclusive, and sustainable transformations.
