Developing agricultural land in the town of Saint-Rémy-de-Provence

Structure : Trophine's Gardens

Saint-Rémy-de-Provence | Provence-Alpes-Côte d'Azur

Our association's objectives are:

- To preserve and enhance agricultural land in the municipality of Saint-Rémy-de-Provence and throughout the Alpilles region.

- To plant trees, hedges, and perennials to promote biodiversity as a whole in this region.

- To raise awareness among residents about the benefits of reforestation and agricultural practices that support soil health and biodiversity.

- To promote local producers who share these values and support the community's food self-sufficiency.

- Acquire or lease agricultural and recreational land to implement these agricultural practices, reforest the land, plant hedges, and promote biodiversity.

- Communicate, organize fundraisers, organize community work projects, events, and gatherings, including the sale of food and beverages.
