Third Place and Edible Garden

Structure : In La Motte

Saint-Saturnin-du-Bois

New Aquitaine

Founded in 2020, the association has expanded its activities over the past three years—notably thanks to the hiring of its staff member and support from the Nouvelle-Aquitaine region.

A la Motte has been awarded the “third places” label—a valuable asset that has largely enabled the association to establish itself and become a leading third place on a regional scale.

“**La Motte de chez nous is a nourishing, mixed garden—a true space for collective exploration, encounters, and the sharing of knowledge—that fosters nature in all its diversity.**

A future “edible forest,” this garden embodies the spirit of the place: respect for nature, biodiversity, food self-sufficiency, and natural rhythms. These are principles inherent to the now global permaculture movement.

Activities and projects of the À la Motte association in La Motte-Aubert (17)

- Coworking space
    - Community café
    - Artistic life
    - Food garden
    - Performance hall rental

• **Community greenhouse**: it's here! The association has found its community greenhouse, which allows us to care for seedlings and grow certain vegetables in a warm environment…

In partnership with the Les Herbes Folles nursery in Saint-Loup, one of the garden beds will be dedicated to growing aromatic and medicinal plants
