Promoting alternative modes of transportation in rural mid-mountain areas to support the ecological transition.

Structure : IN'VD

Millau Occitanie

The association Innovation Véhicules Doux promotes alternative modes of transportation in rural, mid-mountain areas, in support of the ecological transition.

Find the In'VD news briefs every month in Le Journal de Millau

Mobility, land use planning, practical advice, questions, and reflections! In'VD shares its insights in print

Upcoming Screenings

After a screening in Paris at the Macif Foundation, La Nouvelle Aventure Mobile is coming to the Millau cinema. Join Jérôme Zindy on his tour of France as he explores a burgeoning sector: that of Light Intermediate Vehicles!

Véli Weekend in Lozère

The department of Lozère, the Sud Lozère PETR, and the Lozère Mobility Agency co-organized a gathering of associations and manufacturers to introduce the people of Lozère to innovative vehicles on October 10, 11, and 12 October.

Millau Vélorution 2025

Join the Millau Vélorution this Saturday, October 4, 2025! On this year's program: a fun city tour using sustainable transportation!

Want to try out a Véli*?

Do you live in the Grands Causses Regional Nature Park (near Millau, Aveyron)? It's time to (re)invent eco-mobility in rural, mid-mountain areas! Light Intermediate Vehicles can travel at 25 km/h, 45 km/h, or even 90 km/h. Weighing ten to fifty times less than a conventional car, they require fewer batteries and use fewer raw materials during manufacturing. They offer a realistic and scalable solution for getting around quickly and affordably on a daily basis, especially in rural areas, where alternatives to private cars are scarce.

Discover our Vitamines12 program to try out and test eco-friendly vehicles for 1 to 2 months, with no income requirements:

? The goal is to validate and promote ultra-light vehicles with reliable protection against the elements

? Two seats + storage space

? Unbeatable operating costs
