Conducting an assessment of food waste; training employees and volunteers

Structure : Biocyclade

Grand Est

Founded by Hélène Guinot, a consultant and trainer, Biocyclade is a social enterprise

OUR SERVICES:

- Supporting local governments
- Advising businesses and private organizations
- Training local government staff, employees, and volunteers

OUR MISSIONS:

- **Consulting:** Whether you are a public or private entity—such as a tourism facility (vacation center, campground) or a corporate cafeteria—Biocyclade advises you on your institutional food service operations as well as on quality initiatives like eco-label certification.

We conduct **assessments of food waste** and help you comply with the law.

- **Support:** Whether you are a local government, a social housing provider, or an educational institution, Biocyclade supports you in reducing food waste and managing organic waste.

We support you, in particular, in **setting up shared composting sites** at the base of buildings or in neighborhoods, and in the autonomous management of facilities such as schools and nursing homes.

- **Training:** If you wish to train your staff, employees, or volunteers, Biocyclade offers on-site training sessions on community composting, the fight against food waste, and natural gardening.

We also invite you to explore our in-house training programs. Biocyclade is **certified by ADEME** to provide training for site coordinators and composting guides.

OUR TRAINING COURSES:

- Certified **Composting Expert**: "Organizing and Implementing PGprox Operations in the Community"
- Certified **Composting Guide** "Organizing and Implementing PGprox Operations in the Community" RS6396
- **Natural Gardening**
- **Combating food waste in institutional food service**

Biocyclade is a member of the Synercoop Business and Entrepreneurship Cooperative, an accredited training organization (No.: 41 55 00466 55), Qualiopi certified
