Local prevention and management of food waste.

Structure : Orga Neo

Grand Est and Île-de-France

OrgaNeo is an independent consulting firm and training organization dedicated to the prevention and local management of food waste.

Since 2012, **OrgaNeo** has been working on behalf of local governments, businesses, and non-profit organizations on issues related to the fight against **food waste**, **source separation**, and **local composting.** We provide consulting services, feasibility studies, user awareness campaigns, professional training, and technical support.

Training courses offered:

Learn about local food waste prevention and management

Would you like to acquire skills in **local composting**? We offer a comprehensive training program in the **Île-de-France, Grand Est, and Guadeloupe** regions! OrgaNeo adheres to the charter of the Compost Citoyen Network and thus guarantees you training tailored to your needs and compliant with the Stakeholder-Training Framework for local bio-waste management**.**

Get trained in the fight against food waste and sustainable food

Do you want **to reduce food waste**, meet the goals of the EGAlim **law**, or introduce a **vegetarian menu** in your institutional food service establishment? Would you like to offer more local, organic, and high-quality products while keeping your **production costs** under control? OrgaNeo offers training on combating food waste and sustainable food practices. Discover with us a set of tools and best practices to implement effective actions and adopt a low-environmental-impact food approach

Our support services

Do you want to promote **individual** c**omposting** in your area? Do you have a **shared composting** project or a **composting** initiative **for a facility**? OrgaNeo supports you at every stage, from site assessment to monitoring composters:

- Assistance with formalizing the food waste component of your PLPDMA
- Raising public awareness of best practices: webinars and conferences
- Site assessments at building entrances, in neighborhoods, in community gardens, and in institutions
- Assistance with selecting and installing composting equipment
- Training for site coordinators based on the **RCC/ADEME Stakeholder-Training Framework** for local bio-waste management
- Site monitoring
- Provision of our OrgaNeo Workflow tool
- Methodological support
- Educational activities in schools
