MAKE INFORMATION RELATED TO WATER ISSUES ACCESSIBLE

Structure : Eau'Dyssée

Lyon

Auvergne-Rhône-
Alpes

Eau'Dyssée is a nonprofit organization established in 2021 that makes information related to water issues accessible.

- **Objectives**

Eau'Dyssée's objective is to disseminate scientific and technical information in the field of water and all related issues (environment, climate, biodiversity, etc.). The association reaches out to everyone through [interactive workshops](#), which are created by the association's members or in collaboration with external partners.

- **Resources**

The association focuses on two main areas: **creating** workshops and **promoting** them. It can reach out to schools, public institutions, associations, or any other type of organization to offer them a water awareness workshop. To do this, association members can create a specific workshop in collaboration with the institution. Once created, the workshops enrich the Eau'Dyssée catalog and can be shared with other audiences. The workshops created are based on verified scientific sources, which are made available to participants during the workshop.

What exactly is a workshop?

Workshops can take many different forms: exhibitions, games, videos, puzzles, quizzes, etc. As a result, the [volunteer](#) needs can vary greatly: graphic design, concepts, creativity, technical skills—all skills are welcome.
