#agriculture #support

Main mission: to provide support throughout all stages of the project and facilitate the establishment of farmers and artisans of the transition in the Île-de-France region.

Structure : A World of Possibilities: Île-de-France

Île-de-France

With the support of our network of partners and thanks to the local communities that stand with us, Les Champs des Possibles' primary mission is to facilitate the establishment of farmers, artisans, and transition leaders in the Île-de-France region.

With the Les Champs des Possibles cooperative, starting a business in agriculture, food processing, or services related to agriculture or regional development… It's possible! We support you at every stage of your project and connect you with key players in the agricultural settlement process in Île-de-France… Welcome.

You can:

Test your business: Do you want to launch a project in agriculture, food processing, regional development, community outreach, or similar fields in the Île-de-France region? Les Champs des Possibles can support you.

Get trained: Do you want to gain expertise? Find the training that fits your needs, at any stage of your journey, with our certified training organization. Courses open for registration or upon request.

Starting a cooperative: The cooperative brings together entrepreneurs committed to an agroecological and solidarity-based transition, whether through a pilot project or by joining the cooperative after completing their pilot.

Our consulting and awareness-raising **services** on agricultural transition

Are you a local government, a business, or a community group? Do you want to take action for agroecological renewal? For the development and monitoring of an agricultural and development strategy?

The consulting and facilitation entrepreneurs at Les Champs des Possibles will support you through every phase of your project:

- Context analysis, organic agricultural production methods, and product processing (particularly through third-party food hubs),
- Comprehensive strategic planning on food self-sufficiency, local development, resilience, short supply chains, and reuse,
- Education and awareness-raising for children, residents, and citizens…
