Solidarity-based economic cooperative

Structure : Sendra-GES

Provence-Alpes-Côte d'Azur

SENDRA GES is a solidarity-based economic cooperative comprising independent nonprofit associations and organizations whose collective efforts are focused on helping people facing difficulties find employment, the development of social housing, and the establishment of high-quality personal services.

These associations are managed from shared premises and by a shared staff. However, each entity has independent legal and administrative status and its own accounting system.

This organization, structured into two divisions**—"Integration"** and **"Services"**—pools the management expertise of a "social enterprise."

SENDRA GES aims to create economic activity and jobs, as well as services for individuals, communities, and businesses, by promoting integration for harmonious local development. The GES's structures have enhanced their effectiveness by establishing branch offices and drop-in centers.
