#collective #workshop

Foster mutual support and strengthen ties among businesses, local communities, organizations, and citizens.

Structure : Workshop on Popular Ecology

Fresnay-sur-Sarthe Pays de la Loire

The Popular Ecology Workshop brings together citizens and organizations from northern Sarthe to connect environmentalism with better community living. The association acts as a catalyst for local initiatives.

It works to reduce the ecological damage caused by our way of life and to enable the region to adapt to ongoing changes by pooling our knowledge and skills, fostering mutual aid, and building stronger ties between businesses, local governments, associations, and citizens.

Our activities:

- The Climate Fresco: A group game to understand climate change together,
- Waste Fresco: A group activity to understand waste “cycles” together,
- Make Your Own Card Holder from Recycled Plastic: a “Do It Yourself” workshop to transform plastic bags into useful items yourself.

We develop numerous activities for all audiences, based on the association’s three pillars: taking action, understanding, and equipping ourselves

We also run Transilocal 72! TransiLocal, 72 cards on the ecological & social transition in Sarthe, is a fun and collaborative tool for (re)discovering initiatives in Sarthe.
