DELIVERY SERVICE FOR PRODUCTS WITH RETURNABLE PACKAGING

Structure : The Van

Le Fourgon is, above all, a group of passionate individuals who have decided to join forces to bring the deposit-return system back into fashion in France and specialize in **delivering returnable products to homes and offices**, offering a simple, hassle-free solution for **waste-free shopping**.

Why? Recycling bins fill up faster than they can be emptied, and there is no simple, effective solution to help everyone reduce their waste—especially plastic bottles. In fact, no fewer than **36 million plastic bottles** are purchased every day in France, even though the goal is to reduce the number of single-use plastic bottles by **50%** by **2030** (source: ecologie.gouv.fr).
