#collect

8 independent sports recycling and reuse centers to make sports more sustainable and accessible to everyone

Structure : National Network for Sports and Reemployment (RNSR)

Difficulté : facile

The Mission

Donations

We collect donations of all kinds of sports equipment: skis, snowshoes, tents, bicycles, balls... as well as sports clothing, shoes, and accessories. Let us know what you have—there's very little we won't accept, except for helmets or safety gear!

Reuse

Your donations are then sorted, cleaned, inspected, and repaired if necessary to ensure they can be reused! Otherwise, they are repurposed: we're also experimenting with new

ways to create value from obsolete items in collaboration with artisans and designers

Redistribution

We make sports more accessible through low prices: from 60% to 90% off, depending on the item and its condition! From brand-new in the box to refurbished, find your next sports gear responsibly with us: shorts for €3, kimonos for €5, rackets for €10...

Awareness

We create educational and fun workshops for all ages to raise awareness about community-driven reuse, well-being, and a more responsible and eco-friendly approach to sports

Support

We offer support to sports organizations, particularly local clubs and sports event organizers, to train them on the challenges of sustainable development as they apply to their activities

Employment

Through three network organizations—ReSport, FairePlay, and La Recyclerie du Sport Lorraine—we train individuals who are disconnected from the workforce in practical, rewarding, and meaningful trades to facilitate a sustainable transition into employment
