#ecology #farmer #support

Coordinates on-the-ground activities, advocates for organic producers before institutions, and works with agricultural partners to develop the organic sector.

Structure : Agrobio19

Difficulté : facile

Bio Nouvelle-Aquitaine, the regional federation for organic agriculture, works to promote agriculture and food systems that serve the public interest and **to create economic, environmental, and social value within our regions**.

Bio Nouvelle-Aquitaine, Regional Federation of Organic Agriculture, acting as a link between the departmental and national levels, coordinates on-the-ground initiatives, advocates for organic producers before institutions, and collaborates with agricultural partners to develop the organic sector.

Our Missions and Values

Discover the missions and values of Bio Nouvelle-Aquitaine and its departmental groups (GAB):

- **Supporting farmers:** We guide all farmers in their transition to environmentally friendly practices and encourage organic project leaders.

- **Structuring of organic supply chains:** We work to establish local and fair organic supply chains, thereby ensuring a quality food supply for all.
- **Agricultural innovation:** We collaborate with on-the-ground stakeholders to envision and develop the agriculture of tomorrow—more sustainable and adapted to environmental challenges.
- **Representation and partnership:** We defend the interests of organic producers and citizens by collaborating with all stakeholders in the agricultural sector.
- **Political engagement:** We actively participate in the co-creation of public policies that promote organic, local, and high-quality agriculture and food, thus meeting the needs and expectations of society.
