## NATIONAL NETWORK FOR THE PROMOTION OF REUSABLE AND RETURNABLE GLASS CONTAINERS

Structure : In a Box: The Dish

Difficulté : facile

### Committed to a world without single-use items

By participating in the rollout of En Boîte Le Plat, we are taking a stand against the throwaway culture, in favor of a more compassionate, more sustainable society focused on the common good.

### A national network of associations

Across the country, En Boîte Le Plat is supported by local associations. These associations are grouped nationally under the umbrella of En Boîte Le Plat France to pool some of their activities, organize collaboration, define a common strategy, and more effectively advocate for their vision: moving away from a disposable culture through non-profit reuse initiatives.

### An initiative of general interest, driven exclusively by associations

We quickly identified the essential elements for this model to work:

- **Non-profit status:** collective and selfless management to maximize environmental and social impacts,
- **Diversification of resources:** to avoid dependence on revenue and ensure broad accessibility for target audiences,

- **Supported by a local civic group:** to ensure the initiative's local roots and long-term sustainability.
