Network of stakeholders and resource center for sustainable buildings and development

Structure : Envirobât Occitanie

Difficulté : facile

Occitanie

Envirobat Occitanie is a regional professional association serving as a network of stakeholders and a resource center for sustainable buildings and development, with a membership of over 320.

Based in Montpellier and Toulouse, the association operates throughout the region.

Envirobat Occitanie’s objective is to contribute to reducing the environmental footprint of buildings and neighborhoods in Occitanie.

Its mission is to support the ecological and energy transition of the construction and urban planning sectors by mobilizing and informing professional stakeholders. The association thus contributes to achieving the objectives set by the Occitanie Region’s REPOS scenario, by promoting the values of innovation, resilience, and frugality.

In this context, Envirobat Occitanie is committed to:

- facilitate the network of professionals in the region
- work to promote and disseminate best practices
- support stakeholders and their projects

- develop educational tools for support and assessment regarding environmental, economic, and social aspects

Envirobat Occitanie offers a wide range of services tailored to professionals, with the goal of optimizing and pooling skills and resources for greater efficiency:

- access to an online resource library to stay informed about legal and regulatory developments and regional news
- regular thematic meetings, expert discussions, and technical conferences
- knowledge sharing and specific training based on feedback from support and monitoring initiatives led by the resource center
- support mechanisms for project owners and professionals regarding the "Sustainable Buildings" and "Sustainable Neighborhoods" environmental initiatives in Occitanie, adapted to local climate constraints,
- construction and renovation observatories to evaluate projects, analyze practices, and share knowledge and feedback,
- online support for construction and renovation stakeholders
