#collective #garden #mutual aid

Mutual support and the development of community gardens through the exchange of resources and seeds, as well as through gardening workshops

Structure : Gardeners

Difficulté : facile

Montpellier Occitanie

The association's mission is to coordinate a network of all types of collectively managed gardens in the Languedoc-Roussillon region.

It supports them in their initiatives, training, and development through adherence to a charter of best practices.

The association aims to promote and highlight collectively managed gardens by representing them in the region as the local correspondent for the national network of shared gardens, Le Jardin dans Tous Ses États.

Among our many activities:

- Connecting and supporting community gardens in Languedoc-Roussillon (we currently support

around fifty gardens),

- Assisting with the creation of new gardens

- Connecting these gardens with a network of partners (about forty in the region) and professional experts/consultants (about twenty),

- Training for gardeners (permaculture, agroforestry, vegetable seed production, medicinal plants, composting),

- Representing the gardens at various events throughout the year, some of which we organize,

- Planting Incredible Fruit Groves in Montpellier’s urban public spaces!
