#AMAP #garden

It works to improve the quality of life and social cohesion, protect the environment, and preserve the architectural heritage of its region.

Structure : Environmental Triels

Difficulté : facile

Triels-sur-Seine Île-de-France

Triels Environnementworks to improve the quality of life and social ties, protect the environment, and preserve the architectural heritage of Triel and the surrounding region. Open to the public.

An eco-citizen collective dedicated to the environment

Triel Environment is, above all, an association that has been committed for several decades to protecting, promoting, and passing on the natural riches of our region. We are a dynamic collective made up of passionate citizens, dedicated volunteers, and committed experts who share a common vision: that of a world where every action counts toward preserving our planet.

?

A mission that drives us

Our mission is clear: to raise awareness, support, and mobilize residents to build a more sustainable future together. From waste management to ecological gardening and biodiversity conservation initiatives, we implement concrete, accessible projects tailored to everyone.

A place for sharing and action

The Jardin Rive Gauche, the very heart and soul of the association, is a collaborative space where ecology comes to life. In the hands of volunteers, the earth is transformed into fertile ground for exchange, learning, and community. Here, every visitor can learn about sustainable practices and find inspiration to become an agent of change

Our main initiatives:

- Amap
- Repair Café
- Community Cleanups
- Workshops and bike rides
- Bike exchange
- Permaculture with the Jardin Rive Gauche and Les Incroyables Comestibles
- Eco-citizen monitoring (review of urban planning projects, participation in public surveys and consultations, as well as in the CCSPL—Consultative Commission for Local Public Services—and the CCEAM -Consultative Commission on the Environment of the Les Mureaux Airfield-)
