A RECYCLING CENTER SPECIALIZING IN BUILDING MATERIALS AND A SHARED WORKSHOP

Structure : Recyclo'Bat

Difficulté : facile

Toulouse

Occitanie

Recyclo'Bat is the only resource center in Toulouse specializing in building materials. Whether you're a homeowner or a professional, our store—which features 100% reusable materials—is open to everyone.

Come check out our shared woodworking shop, too!

Recyclo'Bat offers a pickup service!

As a reminder, all our materials come from donations; we do not buy or sell: there's no need to contact us about purchases!

By appointment and after assessing, via photos, the quantity and quality of the materials, we'll come **to your home free of charge** for any large items that can't be transported in a car. Our service area is within a 20km radius of our store; you'll find the map at the very bottom of this page.

For **businesses**: excess inventory, construction site scraps, dismantled items, measurement or cutting errors... Your "waste" can be reused, but due to a lack of space or time, you are forced to dispose of it and pay for its processing. We help and support you in optimizing sorting, reducing final waste, and ensuring the reuse of building materials through our network! For a membership fee of €100/year, which includes detailed tracking of collections and social media promotion of our partnership, we organize a customized collection service that can be adapted to fluctuations in your business activity.

Collection is a service that requires time and organization. To ensure mutual understanding and facilitate the collection process, the steps we take together are as follows:

- Contact: You contact us because you have materials to donate. Please provide your contact information and **photos of the materials**.
- Assessment: Based on the information provided, as well as the type and condition of the items offered, we will jointly determine whether or not to accept each item and, if necessary, advise you on a more suitable alternative.
- Pickup: We'll work with you to schedule a date and time to pick up your materials!
